

SALES & MARKETING SYSTEM

PRODUCING SALES OPPORTUNITIES AND CONVERTING THEM INTO PROFITABLE SALES IS ESSENTIAL TO ANY BUSINESS.

Basic Overview

The Marketing Campaign Manager will help you create sales opportunities more efficiently than ever. Sales leads are graphically displayed and controlled through the Dispatch Board. Detailed Estimates can be prepared and later converted to invoices. You will know exactly how your marketing performs, the sales closure rates on your employees, and more.

Sales, Marketing, and CRM Details

Hundreds of Options and Preferences

There are hundreds of preferences and options that control how this feature set functions. Certain fields may be "required" and some can be auto-populated.

Caller Identification with Automatic Lookup (optional)

When the phone rings, the Caller ID system displays all of the callers along with important information about each. You will see if they own a service agreement, owe you money, have sales leads pending, etc. With a right click, you can look up history, add messages, appointments, sales leads, work orders, and "Quick Add". This feature is customizable.

Make Better Decisions with the Marketing Campaign Manager

This feature shows you exactly what advertising and marketing you have in effect and how well each one is performing. For each of your marketing methods, you will be able to see gross sales, expenses, return on investment, cost per sales lead, cost per sales lead closed, closure rate (by person, product, and marketing method), and a lot more.

Track Sales Leads with the Sales Opportunity Manager

The SOM is a great feature set that allows you to enter sales leads and track their progress from start to finish. Sales leads can include products, stage, customized questionnaires, user defined fields, and there are plenty of other data points that can be collected. You will know exactly what stage each sales lead is in. Sales can be "predicted" using our unique probability list. Sales leads can be printed, texted, or emailed**.

Access Details with the Contact Log and Notes Manager

You may type all sorts of notes regarding sales, bids, service work, recommendations, concerns, legal issues, and more. Entries are date & time stamped, and includes the entry person's name as well as a topic and subject. There is also a handy stop watch feature. Notes can be sorted, filtered, searched, printed, and exported. You can have certain alerts popup each time this form is opened.

Create Detailed Estimates and Sales Proposals

Estimates can be created for customers and prospects very quickly. Change Orders are automatically created when the estimate is changed. You can keep very detailed notes on your sales process. Estimates can be setup to achieve a gross profit margin (GMP) and each line item can have a separate GPM.

Document Management and File Linking

The Document Manager allows you to drag and drop MSDS, sales literature, brochures, technical literature, sell sheets, schematic diagrams, and more. The documents can be searched, previewed, and printed as needed. You can go nearly paperless!

The screenshot shows the 'Edit Sales Opportunity' form with the following fields: Date (04/14/2016), Customer/Job (Alesia Weaver), Salesperson (Amber McDonald), Marketing Source (Newspaper), Product (Window Replacement), Description (Whole House Windows), and a 'Qualified' checkbox. A 'Pop-up Notice' checkbox is also present. The form footer indicates it was created and last revised by Ashley M Adams on 4/14/2016.

The screenshot shows the 'Edit Sales Opportunity' form with advanced details: Product (Window Replacement), Priority (High), Probability (Down Payment with Signed Paperwork, 95%), Stage (Follow-up Using Phone and Email), Days in Sales Cycle (15), Status (Awarded), Estimate (77997), Amount (\$2625), and Reason Won/Lost (Great Price). An 'Explain Reason (if needed)' field contains a note about a customer's charming personality. The form footer indicates it was created and last revised by Ashley M Adams on 4/14/2016.

Defined Gross Profit Margin Targets

Each prospect, customer, job, and item can have a default gross profit (markup method) that can be changed at any time

Retail Price and Markup Methods

You may build an unlimited number of markups based on a large list of calculation methods. You can also construct an unlimited number of markup tables.

Sales Commissions and Bonuses

Create sales commissions based on retail pricing, gross profit, fixed rate, percentage of labor, variable, and more. Sales commissions are automatically added to invoices and can be modified there or during payroll processing.

Create PopUp Notes and Alerts

These are handy when you need to be alerted to important information.

Visual Scheduling and Coordination

Preventative Maintenance and Service Agreement visits can be displayed on the Dispatch Board. You can schedule your PM visits whenever you need to. It's easy to reassign your work orders to alternative technicians.

Marketing List Generator and Mail Merge Letters and Labels

Produce mail and call lists based on complex information including equipment, demographics, buying habits, repair history, etc. Create professional looking letters and sales documents and merge them with almost any information in your database.

Printing and Emailing

We have hundreds of sales proposal templates or you can create your own with the report designer. Almost anything can be easily printed, emailed, or texted.

Smart Phone Software

Using the optional Aptora Mobile® software system and an iPhone®, iPad™, Android™, BlackBerry®, or Safari® Web Browser, your salespeople can manage appointments, review sales calls, lookup sales history, and more. Please call for details.

Laptops in the Field

Your technicians can run a full copy of Total Office Manager on a laptop from the field. No special hardware or software is needed. Everything that can be done from an office computer can be done in the field. Our extensive security assures that your employees only have access to what you want them to.

Sales Proposal Kit

If you are looking for an effective sales system for the HVAC industry, Aptora can help. We have taught classes all over America and we offer a complete set of forms, training materials, and DVDs for your sales people and technicians.

Expert Training

We offer online based training and on-site training. We also provide a set of videos and manuals to guide you through processes.

Technical Support and Updates

We know that there is no substitution for being able to just pick up the telephone and talk to someone knowledgeable. That's why Aptora is known for its outstanding technical support.

- All technical support is performed "in-house" by English speaking Americans.
- We do not farm out software programming services or technical support to other countries.
- We have employees, not contractors working from home.
- Our support staff is highly qualified and made of technicians, programmers, and accountants.

No software is perfect and neither is Total Office Manager. The difference is that we will own up to our mistakes and fix them quickly without excuses. Aptora is very aggressive when it comes to enhancing and perfecting Total Office Manager. Updates are easily downloaded from the internet. We offer a variety of support packages to fit any need or budget.

Total Office MANAGER®

AWARD-WINNING SERVICE MANAGEMENT SOFTWARE

Aptora®

©2010-2015 Aptora Corporation. All Rights Reserved.

Since 1996, we have been contractors making software for contractors. Our staff brings years of contracting experience to the ongoing design and evolution of our software. Our client's feedback and input allows us to add more modules to the application to assist their specific need.

Aptora is best known for our award-winning accounting and dispatching software Total Office Manager®. We also produce the world's best flat rate pricing software, called Flat Rate Plus. Both of these applications are proven to deliver an immediate return on investment and better our client's business.
